National Natural Park

Recommendations

Immunizations: Visitors must have their yellow fever vaccination, at least 10 days before their trip and should show the corresponding document upon entering the protected area.

Observations: Given the fragility of the ecosystem you are visiting, and for conservation purposes, shell, rock, coral collecting and animal or plant collecting are not allowed. Likewise, strange animals, aerosols and other contaminating elements, shall be left behind. In order to keep the room in good condition, neither cooking nor smoking is permitted.

Clothes and Supplies: Take cotton clothes, sneakers, hat, mosquito repellent stick, light cover, towels, sun screening lotion, flashlight, plastic garbage bags.

Cleaning: Keep the areas assigned for your stay clean and in good condition. Use de park's garbage cans for biodegradable waste products. Use plastic bags for non biodegradable material that shall be taken with you once you leave the area. Campfires are not allowed.

Ecological Control: Upon arrival visitors must undergo ecological controls in order to avoid the bringing in of elements such as aerosols, alcoholic beverages amongst other things which might endanger biodiversity.

NOTE:

Camping; By Tayrona if you are going camping, take your entire gear.

AMACAYACU

Amacayacu

The Amazons represent one of the rich biodiversives ecosystem and gragil of the planet, it counts with an area of 6.430.0000 kilometers that form the basin of the majestic Amazon River, Colombia owns 403.348 kilometrers of humid tropical forest, wich lodges more than 300 mammalians, 2000 species of fishes, 60.000 species of plants and 2 million species of insects. GORGONA

Gorgona

Gorgona Island received its name from Francisco Pizarro in 1527. Since there were snakes on the island, Pizarro was inspired from the Greek Mythology character whose hair was made of snakes. Gorgona Park is 61.687 hectares (about 152.366) acres and includes Gorgona and Gorgonillo Islands in the Pacific Ocean. Gorgona is an oceanic island separated from the continent by a dip 270 meters (about 885.82 ft) deep. Because of its richness in vegetation and coral platforms, Gorgona is considered a living laboratory. The total area of the major island is about 24 sq.kms. (approximately 9.26sq miles). It is mountainous and its highest peak is Cerro Trinidad 330 mts. (about 1082.67 ft) above sea level. To the southeast lies Gorgonilla Island with its highest mountain rising 90 meters (about 295.27ft) high.
